

Serial No.: 10/511,672
Docket No.: 28951.2176

IN THE SPECIFICATION:

Please amend the last paragraph beginning on page 4 as follows:

A pair of magnets 21 are disposed in parallel in a manner sandwiching bar-shaped center pole ~~piece~~ section 23A provided on lower plate 23. Accordingly, center-pole section 23A is positioned inside rectangular magnetic gap window 22A of upper plate 22. Two parallel straight sections between center pole ~~piece~~ section 23A and upper plate 22 thus form magnetic gap 25. Frame 26 is coupled to magnetic circuit 24, and diaphragm 27 is coupled to the perimeter of frame 26.
